Office Action Summary	Application No. 10/812,205	Applicant(s) O'DONNELL ET AL.	
	Examiner Matthew D. Hoel	Art Unit 3713	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 to 36, drawn to a method and system for two or more lottery authorities to enter into an agreement to operate a lottery, classified in class 463, subclass 17.
 - II. Claims 37 to 64, drawn to a method and system for operation of a lottery by a lottery authority, classified in class 463, subclass 17.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a business method for two or more lottery authorities to enter into a contract for operating a multi-state lottery such as PowerBall TM. Group I (Claim 4) is also a method of selecting an apparatus, which raises a 112 issue as to whether an apparatus and a method are being claimed in the same claim. Claim 1 is a method of entering into a contract, which raises a 101 issue as to whether these claims are merely a manipulation of abstract ideas, but these issues will be evaluated in the first office action. Group I also raises public policy issues, as a state or multiple states may have to change their laws in order to implement the claimed invention. Group II is drawn to a method and system for operating a lottery, which is more typical of the claims seen in class 463,

subclass 17 applications. Group I will require a search into business methods, consultations with primary examiners for 101 and 112 issues, and an inquiry into public policy issues; Group II will require a search into lottery systems and methods. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to the applicants' representative, Gregory Moravan, on Feb. 1st, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Moravan indicated that he would like to see a written requirement.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

7. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

8. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 3713

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew D. Hoel whose telephone number is (571) 272-5961. The examiner can normally be reached on Mon. to Fri., 8:00 A.M. to 4:30 P.M.

10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Xuan M. Thai can be reached on (571) 272-7147. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

11. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
